About Safe Software

Kerala-based Safe Software and Integrated Solutions is an ISO 9001:27001 certified company with 100 plus employees and more than 350 plus clients across India and abroad. The clients include those from banking, insurance, manufacturing, retail, hospitality, healthcare, education and e-governance domains.

Challenges for Safe Software

- Safe Software and Integrated Solutions Pvt Ltd has a product line that consists of banking and non-banking products. Safe Software caters to the changing needs of the Banking industry, and they offer Core Banking Software along with other functional solutions such as Asset Liability Management System, Virtual Banking, and Switching Solutions and so on. IT infrastructure plays a critical part in meeting the growing demand and serving new customer services in the financial sector.
- Safe Software was looking for partnering with an industry leader in Cloud Services to help them deliver reliable IT infrastructure services to their customers. They were looking to partner with a Cloud Service Provider who could help them deliver resilient infrastructure and enable them to deliver a centralized mission-critical operation like core banking solutions to their customers.

The NxtGen Solution

- NxtGen understands that banks have an increased focus on IT-related compliance in order to effectively deliver their services in a secure and seamless manner to their customers. NxtGen's Enterprise Cloud Services delivered Safe Software an on-demand and highly scalable IT infrastructure with guaranteed 100% availability all times while ensuring that the customer data is secure.
- NxtGen's Disaster Recovery solution makes it possible for Safe Software to keep-up with their business demand, increase resiliency and help reduce the damage that an IT disruption can have on the bank's continued operation.

The Outcome

- NxtGen's pay-per-use model helped Safe Software to save substantially around 50% of their IT spend along with guaranteed & secure services meeting 100% regulatory compliance.
- Safe Software managed to deliver a 100% available core banking solution to their customers through NxtGen's Enterprise Cloud Services.

“ NxtGen's pay-per-use model was really helpful to us as a company as well as to our customers. ”
